

Eclipse Identity Recognition Corporation

2025 PRODUCT OFFERINGS

Stephen D. Miller, CEO

EclipseIR develops facial recognition software optimized for sub-optimal video conditions.

Technology evolution by customer's request.
“We need a tool that can assist us in identity recognition”

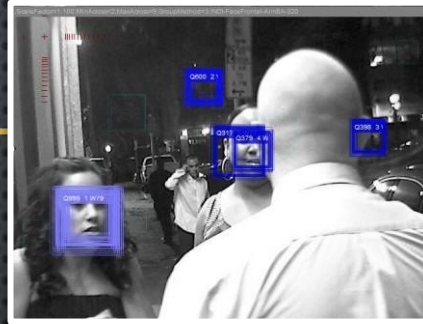

EclipseIR begins with understanding the facial complexities in order to develop advanced techniques in facial arithmetic

Facial complexities

- The forehead to the chin
- Fourteen facial bones
- Three layers of skin with 20,000 pores
- Varying skin tone
- Average 2.65 inches between the eyes
- Up to 5-megapixel eye resolution
- Ethnic variations

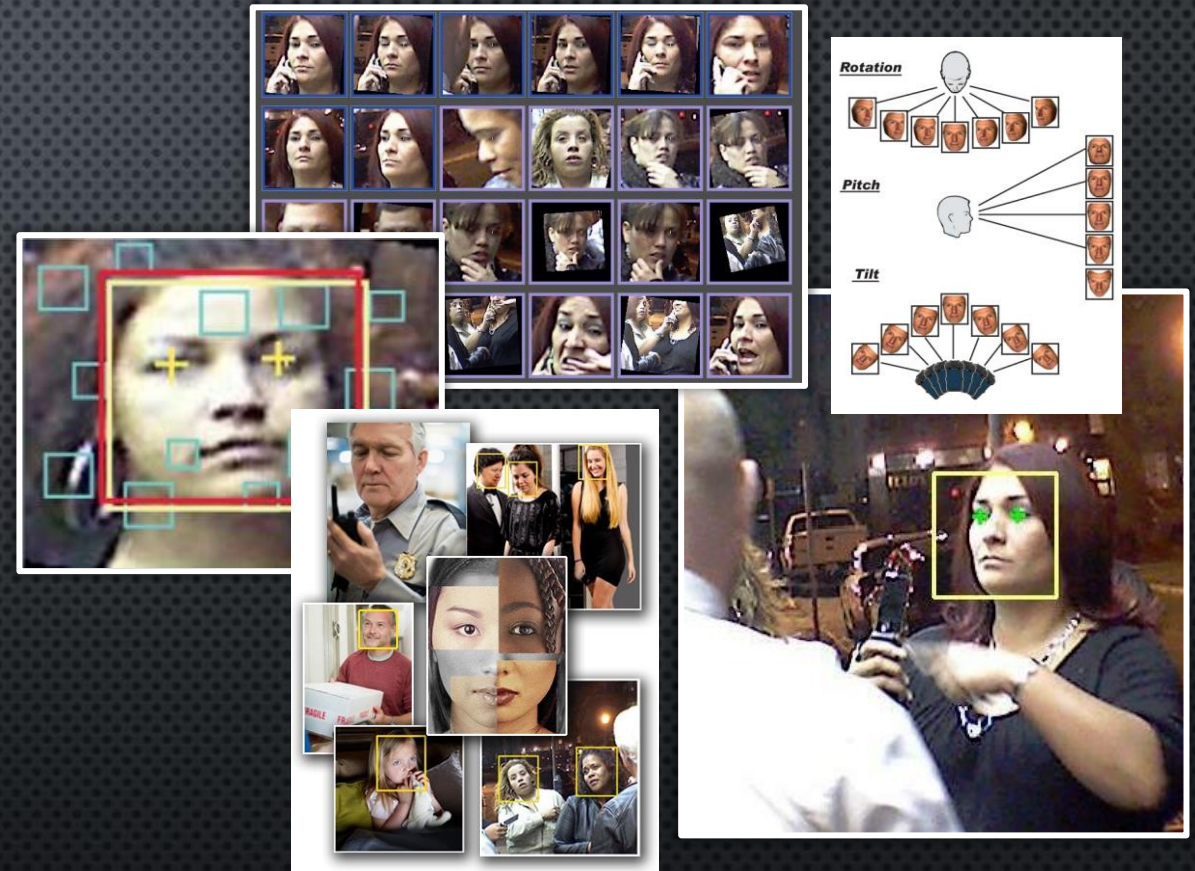

INDIFACE Facial Recognition Engine

Our core technology

Detects faces from video streams and compares to databases

Advanced Facial Recognition Technology to Identify persons of interest

- Proven facial recognition engine
- Skin tone variations
- Made in USA
- Millions of faces processed
- Award winning
- Tested by advanced test suites of data

MatchPoint Series

Live video Surveillance and Monitoring

SearchPoint

Investigative Analysis of Stored and Provided Video

Advanced facial recognition products with market focus

MatchPoint *LITE*

- Live video monitoring
- Small Business security
- Turn-key single-channel
- Rapid deployment
- VMS capabilities
- Static configurable

MatchPoint 6

- Live video monitoring
- Corporate and Commercial Security
- Multi-channel monitoring
- Increased database capacity
- Extend VMS capabilities
- Static/dynamic configurable

MatchPoint *Commander*

- Live video monitoring
- Law Enforcement & Commercial Security
- Multi-channel monitoring
- Enhanced communications and notifications
- Large database size
- Static/dynamic configurable

SearchPoint

- Investigative Analysis
- Corporate and Government
- Stored and recorded video
- Image Enhancement
- Auto Analysis of stored video.

MatchPoint LITE

Rapid deployment facial recognition for recognizing persons of interest (good and bad) at single entry and exit locations.

- Doctor offices
- Nightclubs
- Supermarket
- Office buildings
- Casinos
- Pharmacies
- Office buildings
- Pharmacies
- People counting
- And more..

MatchPoint LITE

Key Features

- Live camera viewing
- Find/Detect Faces
- Compares/Match Faces
- Alert on matched faces
- Audible alarms
- Search Identity
- User customizable
- Video frame storage capability
- 250 Person database

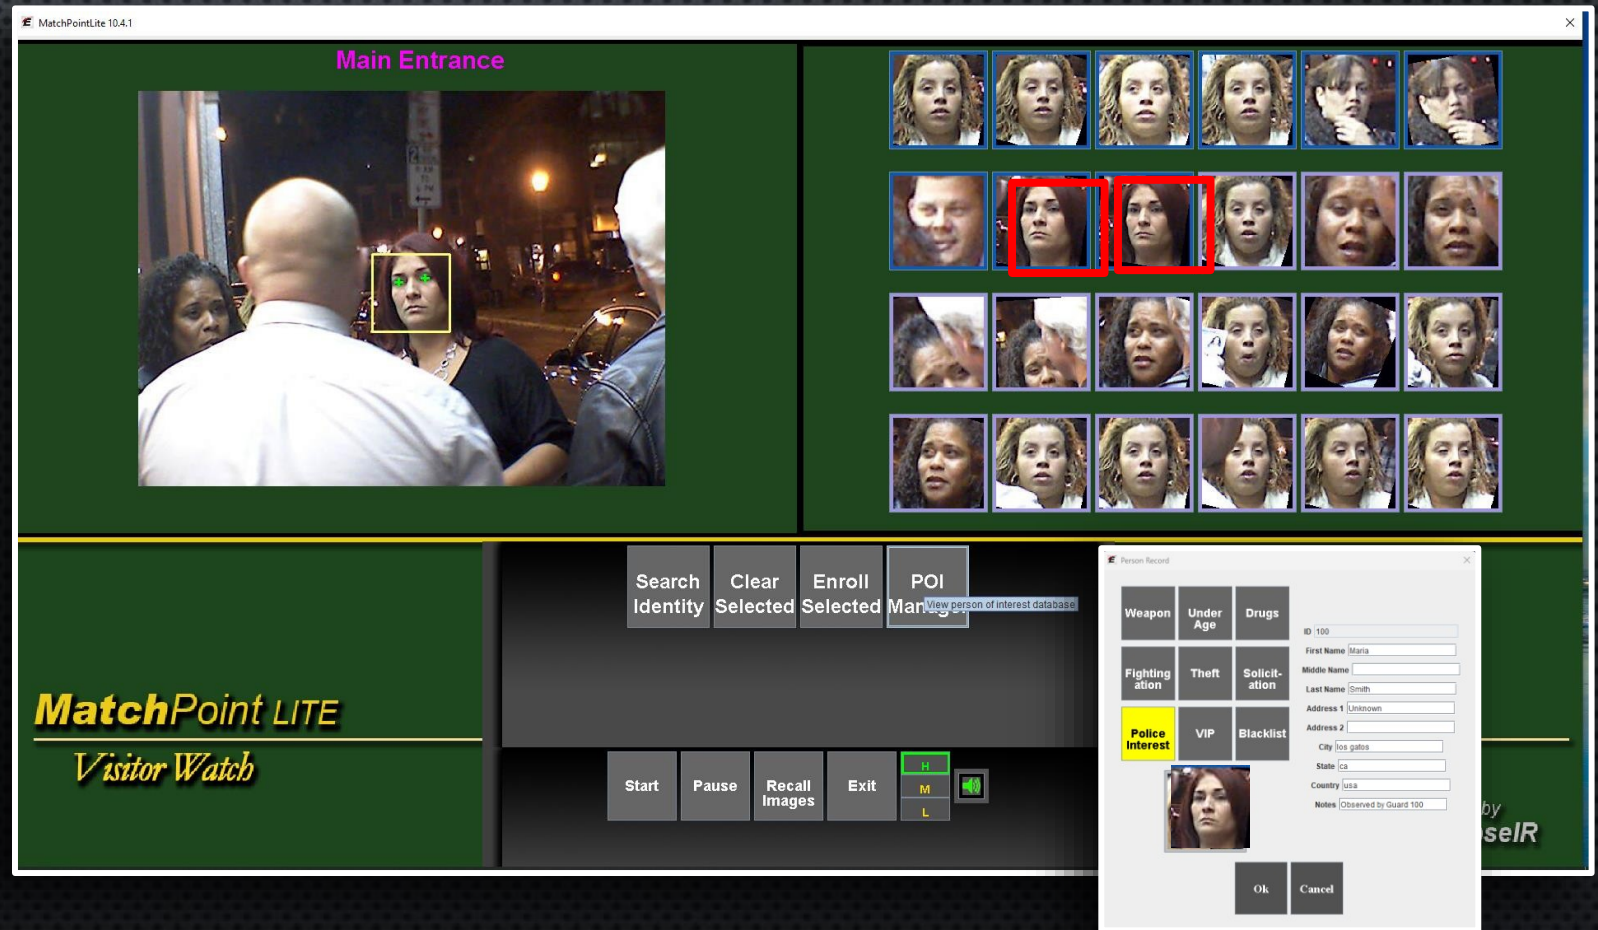

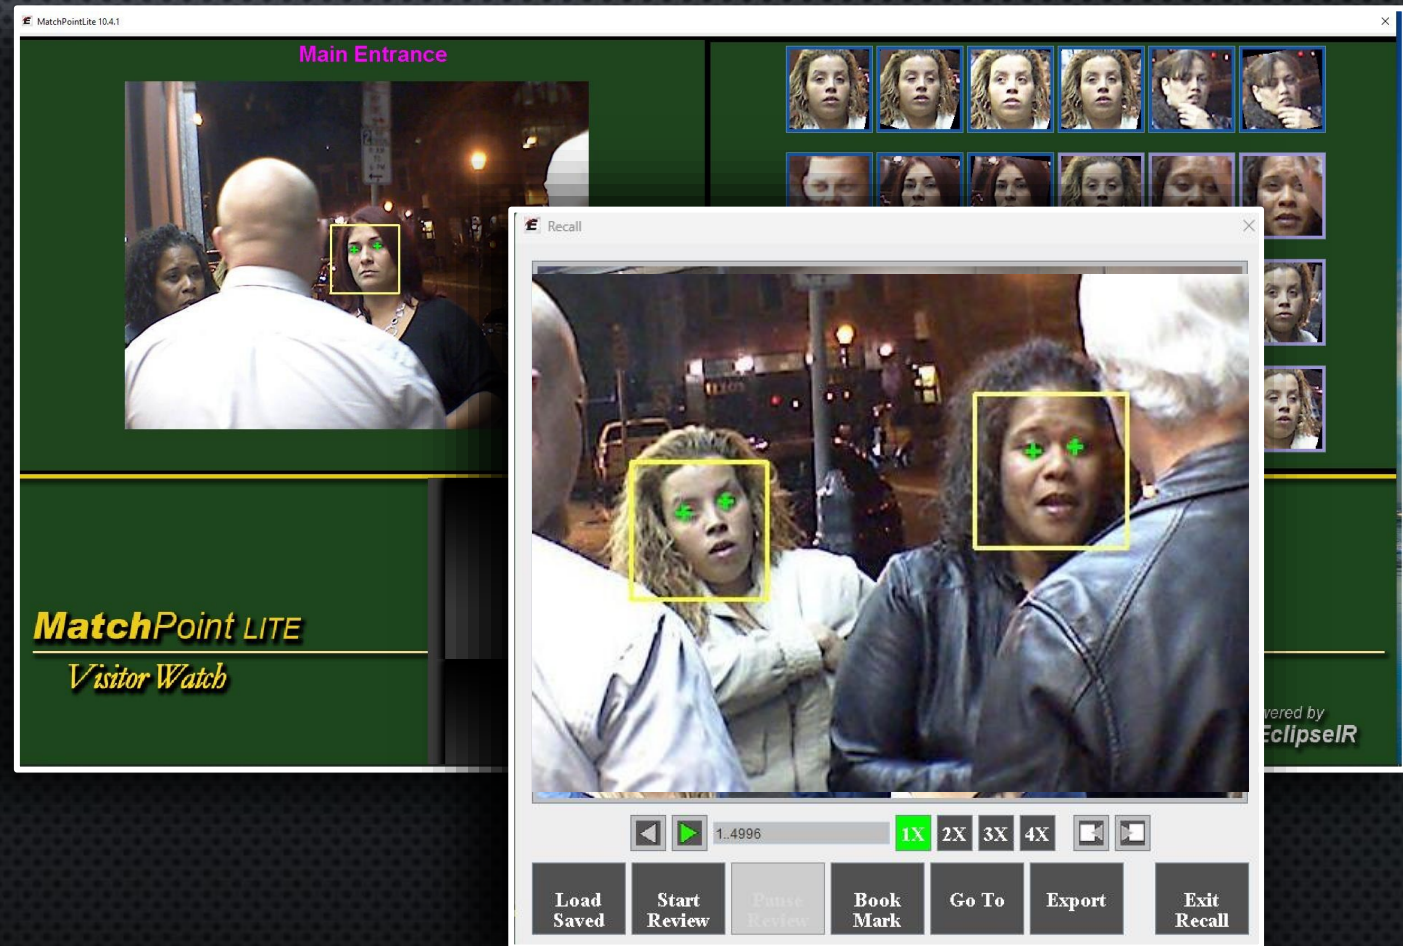

Image Recall:

- Examine past video frames
- Management features
- Bookmark locations within video
- Export to other databases

MatchPoint 6

Facial recognition on multiple channels

Users can monitor multiple entrances and exits for persons of interest.

Undesirables, Criminals, etc.

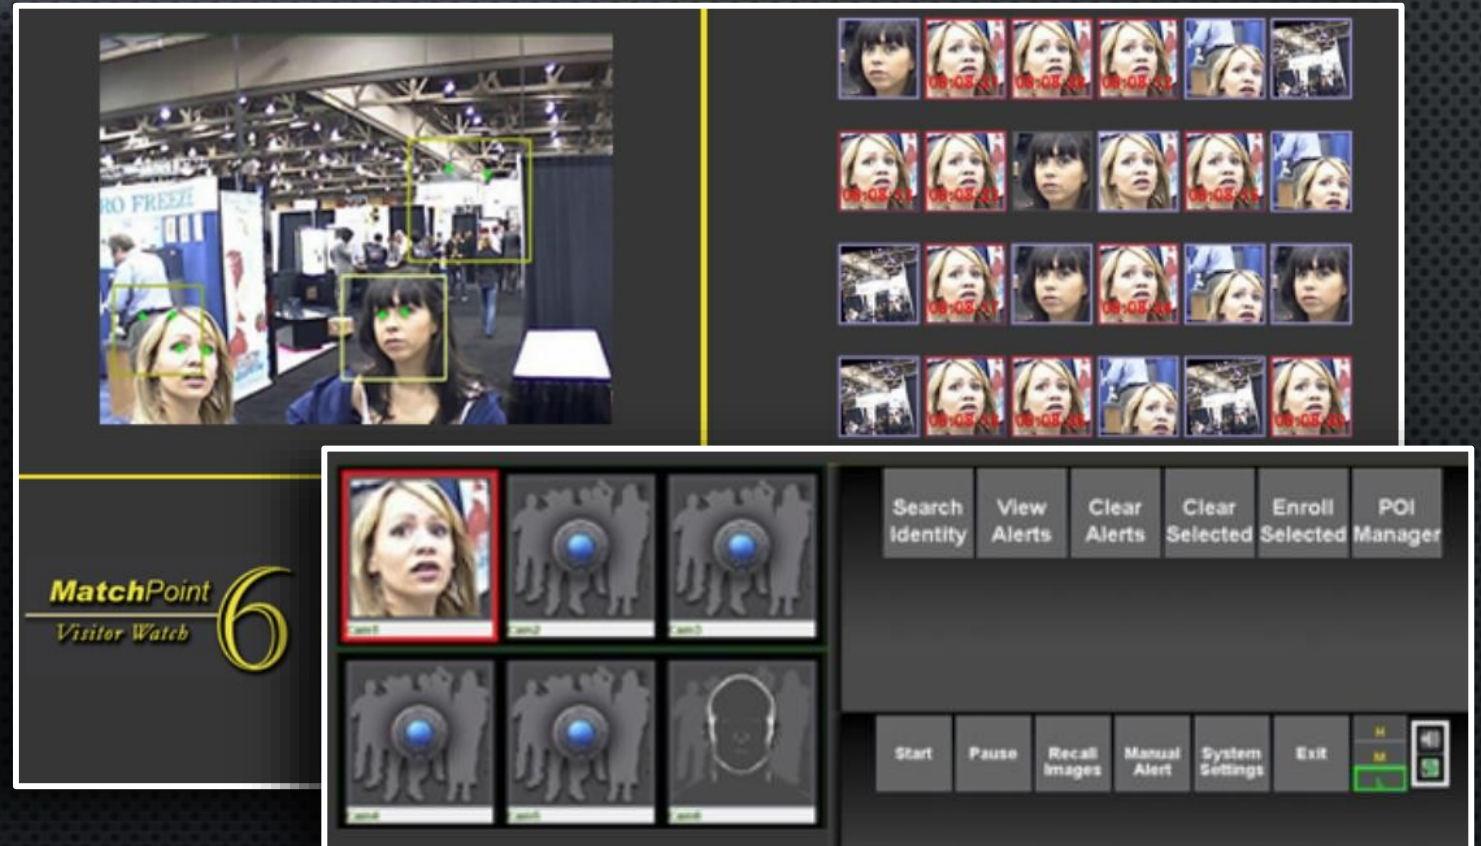

VIPs, Loyalty Programs, etc.

- For mid-size corporate and commercial venues

MatchPoint 6

Key Features:

- Six simultaneous cameras
- Dedicated enrollment channel
- 10,000-person database capacity
- Alerts from all cameras
- Advanced database search
- Image Recalls 2 weeks
- Expanded management tools

MatchPoint Commander

Multiple cameras for high security operations in enterprise deployments.

Advanced communications for rapid security response.

Detected or recognized faces can be transmitted via text messaging and email.

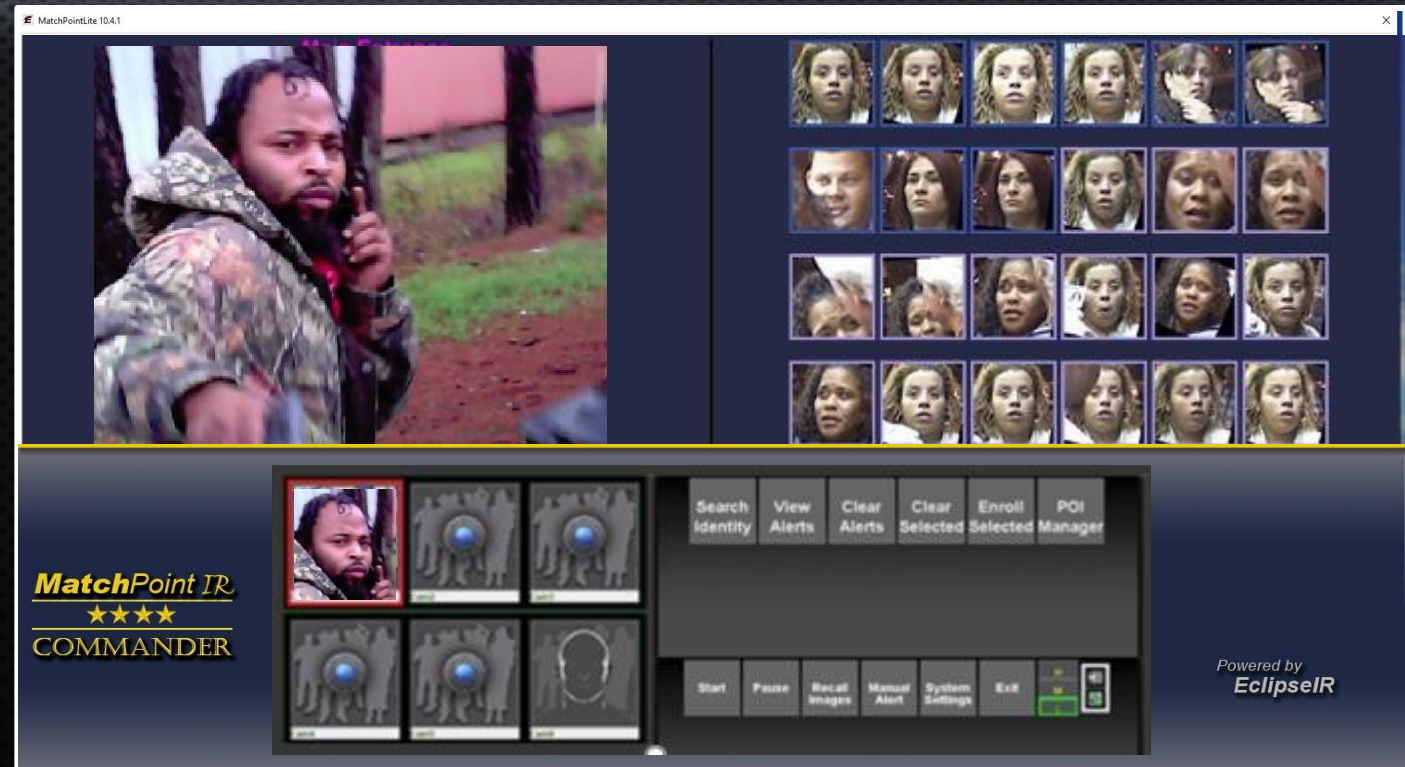

- Cities and local government
- Hospitals
- Corporations
- Universities
- Government and law enforcement

MatchPoint Commander

Multiple-camera with enhanced communications and alerts.

Key Features:

- Six simultaneous cameras
- 100,000-person database capacity
- Alerts from all cameras
- Advanced database search
- Image recall up to 4 weeks
- Advanced notifications and communications of detected and recognized faces.

MatchPoint Commander

Automated notifications of detected and recognized faces to mobile or email.

- User configuration
- SMS (low and high bandwidth)
- Email (low and high bandwidth)
- Manual Notifications

The image displays the MatchPoint Commander interface for live video surveillance. It includes a main video feed showing a person's face with a red bounding box indicating detection. Below the feed is a 'MatchPoint IR' logo with 'COMMANDER' text. To the right, a 'Notify User Data' configuration window is open, showing fields for Name (steve), ID (#1), Phone Number (14088880892), and Email (smiller@eclipseIR.com). The window also features checkboxes for Detect, Match, and Search Enable, and options for SMS and Email notifications. A 'Manual' checkbox is also present. Below the configuration window, a mobile phone displays an 'Alert notification' with the EclipseIR logo and the following details: Name: Enrique Monantanez, Address: 15647 La Paz, Bogota, Colombia, ROI: Gang related drug. To the right of the phone, a larger window shows the 'Alert Notification' details, including the name, address, and ROI, along with a 'Notification of Person of Interest detected by EclipseIR facial recognition' message.

SearchPoint

When video is received from a crime the *SearchPoint* can automatically process video frames to detect match. and recognize faces and present the results to the user.

Video frames can also be enhanced for more accurate results.

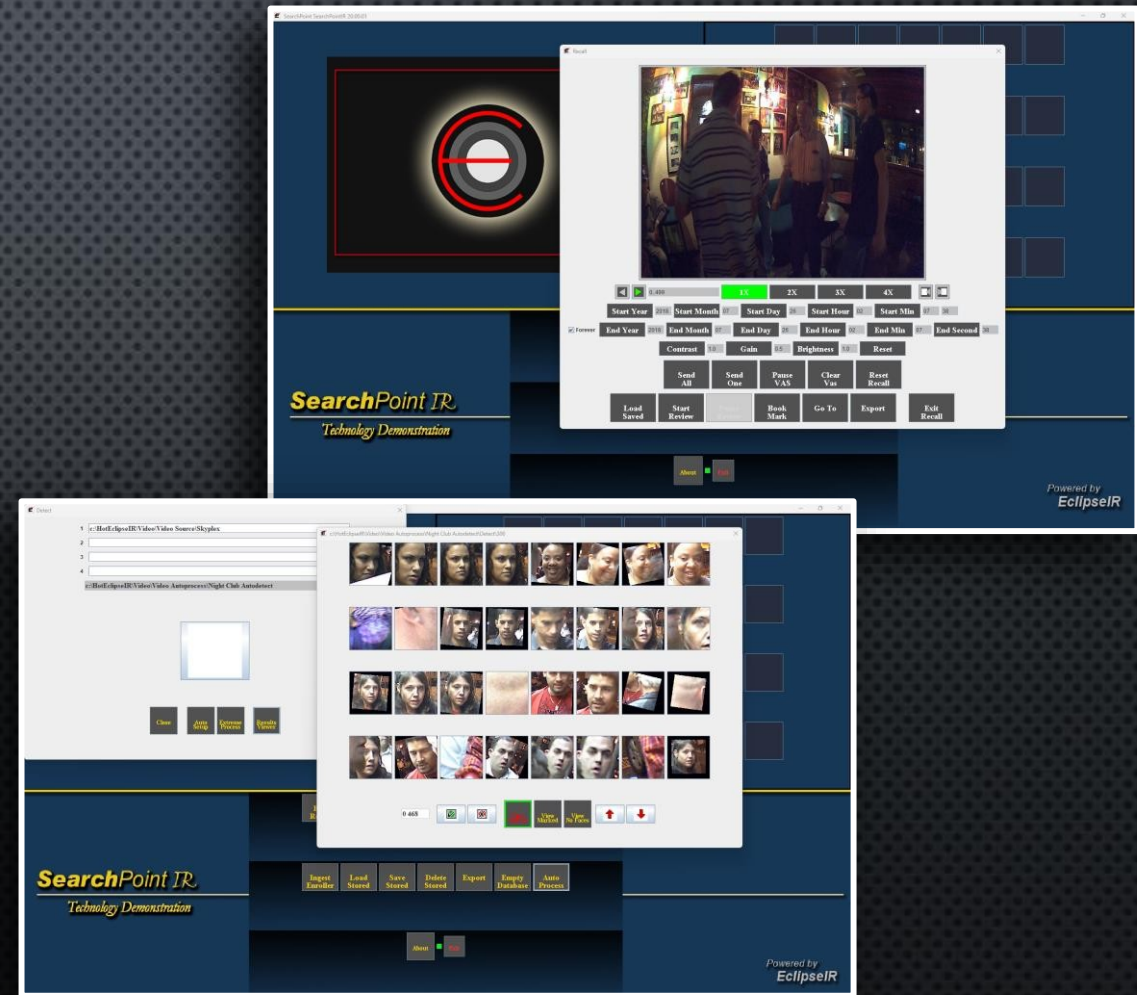

- Command and control centers
- Police departments
- Casinos
- Universities
- Hospitals
- Hotels
- Supermarkets
- Apartment buildings

SearchPoint

Advanced video facial recognition management from stored/recorded video images for investigative analysis.

Key Features:

- VMS controls
- Video Frame enhancement
- Auto processing from stored video for detected and recognized faces.
- Facial database creation and management
- Database size 100,000

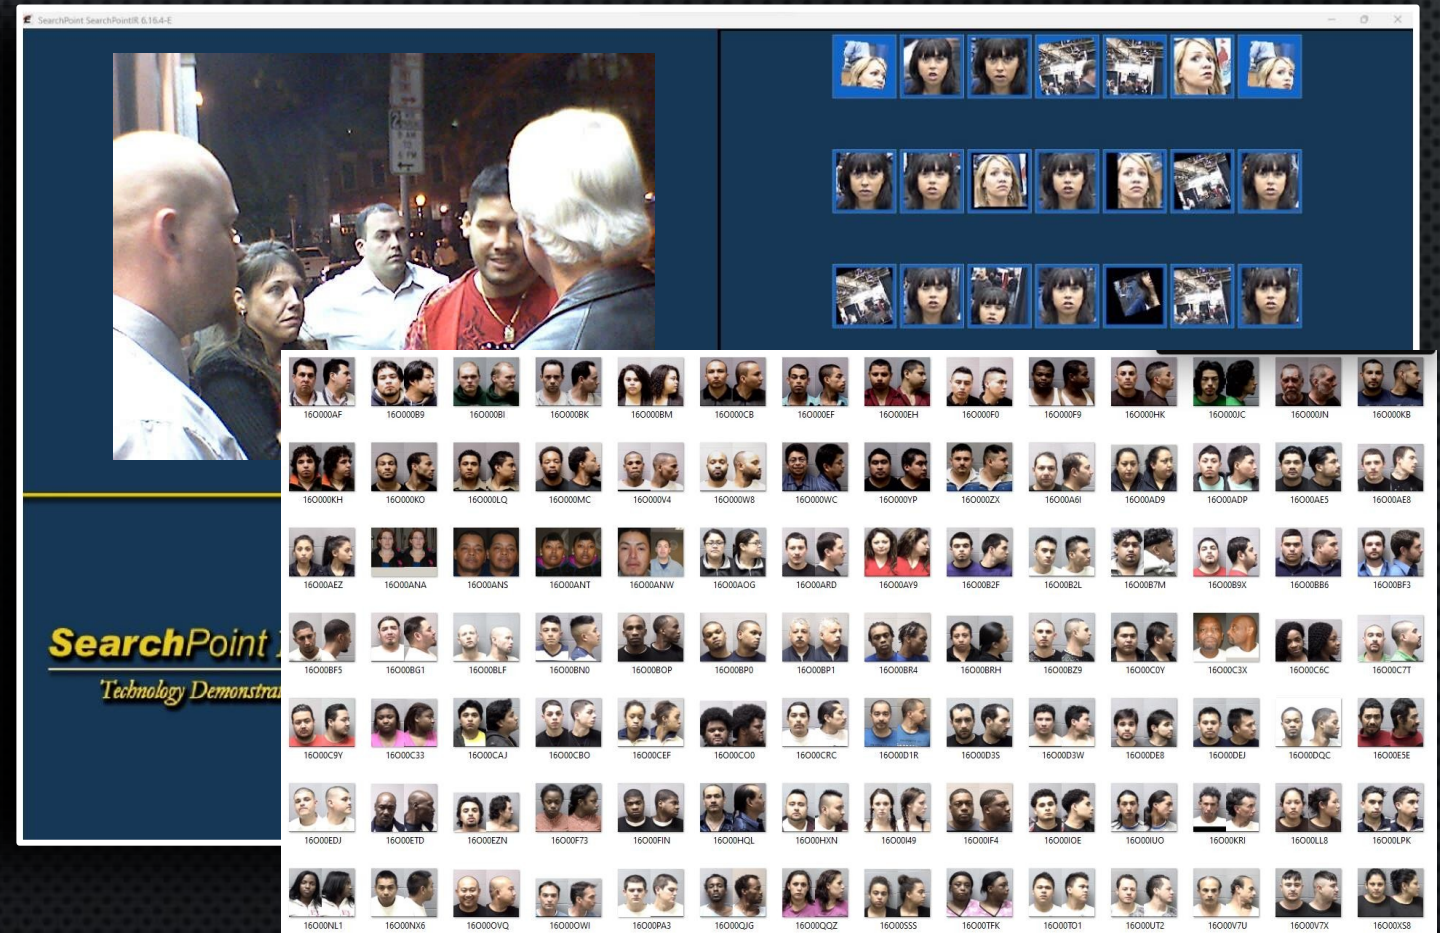

SearchPoint

Database Management.

Key Features:

- Database creation
 - Dynamic
 - Automatic
- Database import
- Database export
- Database deletion

Advanced facial recognition products with market focus

Small Business Security

MatchPoint *LITE*

- Turn-key single-channel
- Rapid deployment
- Images Recall

Corporate & Enterprise Security

MatchPoint 6

- Live video analysis
- Multi-channel monitoring
- Large database capacity

Law Enforcement & Government

MatchPoint *Commander*

- Live multi-channel analysis
- Enhanced communications and notifications

Investigative Video Analysis

SearchPoint

- Investigative Analysis
- Stored and recorded video Biometric analysis
- Image Enhancement
- Auto Processing

APPENDIX A TECHNOLOGY

- Detect faces in video
- Compare faces to database
- Match Persons of Interest

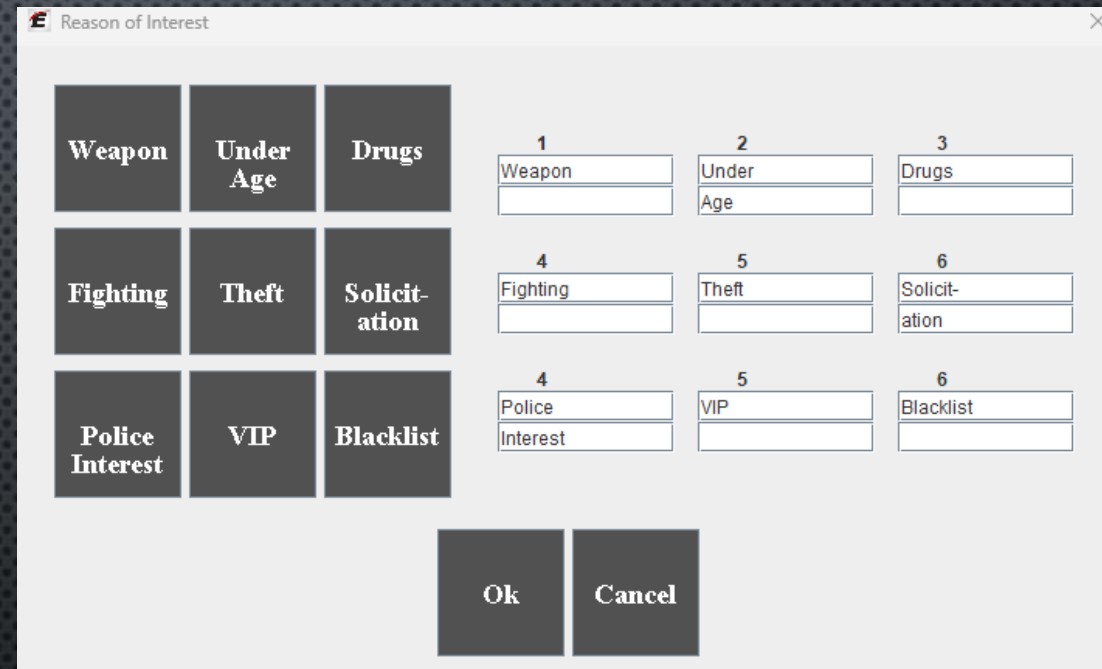

Empowering the User through optimization

- Reasons of Interest (ROI)
- System performance thresholds
- Recall settings
- Database settings
- Camera configuration

Key User-defined Features:

- Reasons of Interest (ROI)
 - What's important to know about the person
 - Stored in the database
 - User customizable
- System performance thresholds
- Recall settings
- Database settings
- Camera configuration

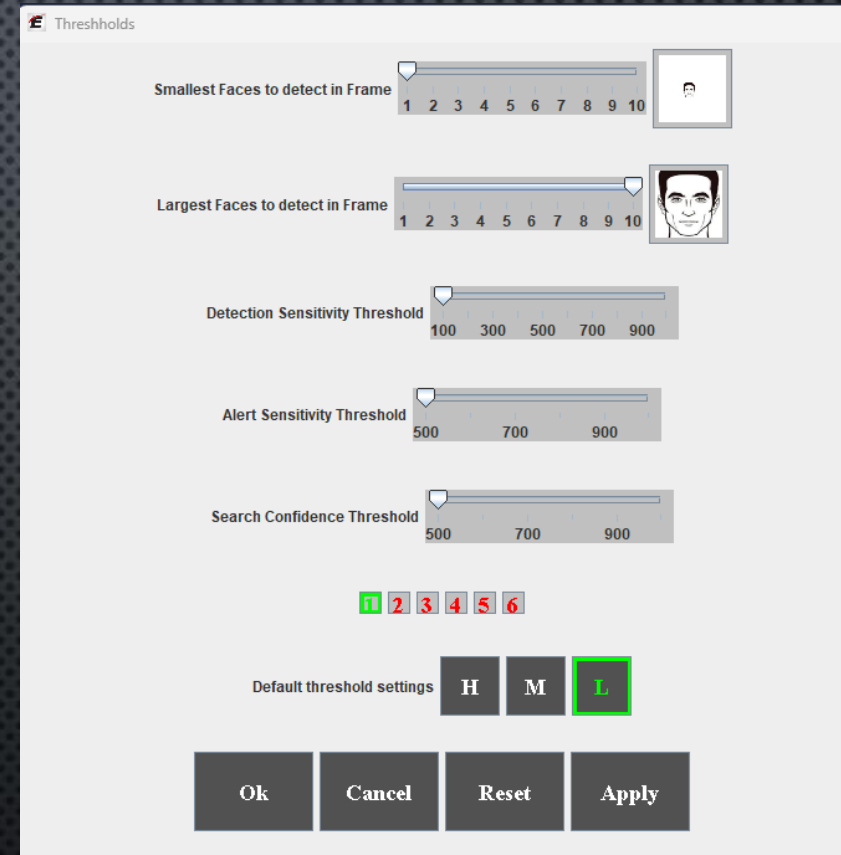

The image shows a software window titled "Reason of Interest" with a close button (X) in the top right corner. The window contains a 3x3 grid of buttons on the left and a corresponding 3x3 grid of text input fields on the right. The buttons are labeled: "Weapon", "Under Age", "Drugs", "Fighting", "Theft", "Solicitation", "Police Interest", "VIP", and "Blacklist". The input fields are numbered 1 through 6 and contain the following text: Field 1: "Weapon"; Field 2: "Under Age"; Field 3: "Drugs"; Field 4: "Fighting"; Field 5: "Theft"; Field 6: "Solicitation"; Field 7: "Police Interest"; Field 8: "VIP"; Field 9: "Blacklist". At the bottom right of the window are "Ok" and "Cancel" buttons.

1	2	3
Weapon	Under Age	Drugs
4	5	6
Fighting	Theft	Solicitation
7	8	9
Police Interest	VIP	Blacklist

Ok Cancel

Key User-defined Features:

- Reasons of Interest (ROI)
- System performance thresholds
 - User define confidence levels
 - Detection
 - Match
 - Search
 - Dynamic
 - Different levels in multicamera configurations
- Recall settings
- Database settings
- Camera configuration

Key Differentiators

- Simultaneous multiple face capture from video surveillance
- Single-face identity enrollment
- Dynamic face database creation
- User-defined confidence thresholds
- Personal trait-identity recognition technology
- Mature and field-proven core technology
